

3DEXPERIENCE

POWERED BY POWERHOUSE 3

PICTUREBOOK

INCREASE PROCESS EFFICIENCY
AND CREATIVE COLLABORATION

A dark-colored Opel Adam car is shown from a front-three-quarter view. The car's license plate reads 'ADAM'. The background is a bright, sunlit area with a building structure visible. The car's headlights and grille are prominent.

3DEXCITE PICTUREBOOK, the data management and creative collaboration platform, increases productivity and offers full transparency for visual data – from CAD files to high-end 3D visualizations. While simple for beginners to use, it provides a high level of security and accessibility thanks to platform-independent online access.

With the new version 7, you save time and resources thanks to enhanced collaboration capabilities for web meetings, review tools and image renderings. The integrated pipeline improves visualization data management by increasing the scope for automation and reducing costs. For people on the go, offers a mobile version, enabling quick mobile access to renderings and realtime 3D models.

CREATE.

Accelerate web-based image production

Equipped with advanced, web-based image production, the enhanced Composer offers high quality and creative flexibility based on global illumination, post effects and HDR lighting. Load models much faster and accelerate the entire image production process. Improved render node handling simplifies collaboration for render resources.

COLLABORATE.

Facilitate global decision-making

Take less time to reach key decisions by conducting 2D and 3D meetings directly in your web browser with InstantMeeting. Attendees with access to any level of available hardware can join the meeting and benefit from guaranteed data security.

The updated interface facilitates quick and intuitive content sharing to provide an enhanced meeting space. Schedule meetings and book render-resources directly from a web browser. Follow up the meeting by easily sharing minutes with all attendees.

INTEGRATE.

Boost lightweight PDM integration

PICTUREBOOK 7 offers an integrated visual data management solution that enhances process efficiency and overall reliability.

The system is built on metadata, structure handling, conversion and update management tools with full DELTAGEN integration. Prevent unintended alterations via asset lock and keep track of model changes in 3D thru versioning.

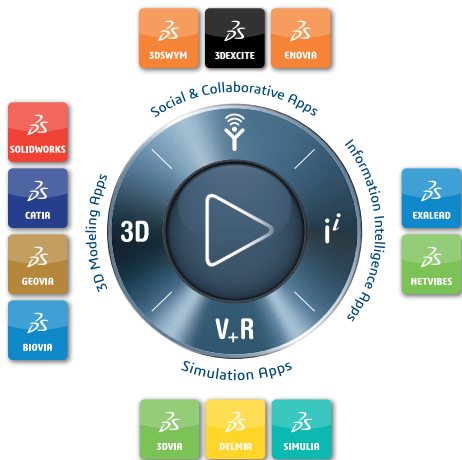

Browse PICTUREBOOK data directly from the Windows file system via Windows Extension for easy data exchange with office applications and image tools.

XPLORE PICTUREBOOK.

Connect annywhere

XPLORE PICTUREBOOK brings key capabilities of PICTUREBOOK to mobile devices. Enjoy intuitive handling and interact with 3D models in realtime, even with no previous 3D experience. Review projects on-the-go, perform asset searches and feedback loops from anywhere.

Our **3DEXPERIENCE®** platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the **3DEXPERIENCE®** Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 170,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
